

Lawyer in Belleville

Lawyer in Belleville - Our Environmental Law team advises and represents clients in both the public and private sectors whose activities are subject to environmental regulation. Our team combines very specialized environmental knowledge together with a broad range of legal disciplines. Our specialized environmental law practitioners work directly with experts in litigation, corporate/commercial law and municipal law.

We provide strategic environmental and project management advice, as we know that our clients must balance solid business decisions with sound environmental practices. We act as counsel to proponents of major infrastructure projects throughout environmental assessments.

Our office gives legal recommendation and provides regulatory intervention training which goes beyond what different firms are given by the majority of offices. Through field rehearsals and seminars, we prepare clients for probable regulatory intervention to help avoid enforcement procedures.

We provide environmental counsel on corporate transactions of various size and complexity comprising the purchase or sale of assets and shares, as well as associated financings.

Our brownfields redevelopment services consist of advising on tax incremental financing; initiating and processing all required approvals and applications; overseeing and engaging consultants to prepare remedial action plans; Records of Site Condition and/or Site Specific Risk Assessments; and liaising together with Ministry of Environment and municipal officials.

Our lawyers provide creative and practical solutions for handling regulatory investigations and inspections. We help clients to prepare for probable future investigations. Our experienced litigators represent clients charged under federal, municipal and provincial environmental and related legislation.
