

## Belleville Accident Lawyer

Belleville Accident Lawyer - Our Intellectual Property (IP) Team understands the value and importance of your intellectual property. In order to assist you license and protect your intellectual property, we offer different legal assistance related to trademarks, trade secrets, copyright and industrial designs. Our clients are those involved within the licensing, use, creation, protection and acquisition of intellectual property. Our IP lawyers have various years of experience securing patent, trademark, copyright and industrial design registrations nationally and internationally. We are experienced at enforcing your intellectual property rights.

We provide the following Patent assistance: filing, prosecution and preparation of patent applications; prior art searching; licensing and assignments; enforcement.

For Trademarks, we provide the following: opinions and searching relating to registration of design, word, certification or public official marks and distinguishing guises; preparation and filing of applications for registration; licensing, franchising and assignment agreements; opposition procedures before the Trade-mark Opposition Board; infringement and passing-off opinions; renewals and expungement (removal) applications; trademark enforcement and defense.

For Copyrights, we provide searching; licensing of literary (including software), dramatic and musical works; preparation, filing and prosecution of applications for registration; infringement opinions; assignment and copyright protected works and sale of copyright; copyright defense and enforcement.

We help preserve your organization's competitive advantage through the protection of Trade Secrets. We create programs and draft agreements for the protection of confidential information.

We offer searching and availability opinions for Industrial Designs; licensing and assignment; filing, prosecution and preparation of registration applications.

Our clients come from different trades such as hotels, agriculture, entertainment, manufacturing, technology and travel.
