

## Belleville Patent Lawyers

Belleville Patent Lawyers - Our company leads the way in intellectual property law. We have an Intellectual Property (IP) Group with various technological expertise specializing in the protection, use, exploitation and development of intellectual property and information technology.

Our team is knowledgeable and experienced at registrations, patent applications and trade-mark applications. Our members have assisted with a lot of industrial design applications and registrations.

Various scientific and legal backgrounds are required to be able to offer effective legal suggestion concerning specialized and complex IP-related issues. Our professionals have studied the sciences at advanced levels. Some have engineering degrees while others have graduate degrees in the fields of chemistry, physics, biotechnology, electrical engineering, electronics and engineering physics. Among our group are members with doctoral degrees in nutrition and metabolism, applied chemistry, analytical chemistry, genetics, plant biogenetics, telecommunications, and oncology. Advanced scientific backgrounds along with considerable experience at the bench equip our scientific professionals with excellent expertise and skills.

### The Industry

These days, intangible property is the most valuable asset of lots of research organizations and businesses. Obtaining cost-effective and effective protection and control of intellectual property is essential in a knowledge-driven economy. Technology, telecommunications, and cultural industries are important to the nation's economic health and growth. To guarantee continued economic success, businesses must have a well-developed intellectual property plan.

Gaining access to the rights of others through licensing-in or cross-licensing as their is a trend to protect the results of research previous to public dissemination grows. Flexibility is therefore in a position in intellectual property rights to serve the dual purpose of providing an asset used to add revenues through licensing and to secure a niche market. A start-up or research-oriented organization could attain significant advantages by combining intellectual property assets through cross-licensing with those of a large global business.

### Protecting Intangible Assets

For a lot of companies in today's competitive climate, intangible assets like trade secrets, goodwill and brands are often at the heart of commercial success. Therefore, protecting intangible assets, which can consist of a significant portion of their value, is an essential approach to business.

### Inter-disciplinary Approach

We can offer a full range of services because of our inter-disciplinary approach. We are well positioned to offer up-to-date and knowledgeable advice both to companies in the field of technology and to those affected only incidentally by new technological developments.

We work closely together with professionals in the areas of banking; capital markets; human resources; employment law; litigation; tax; and mergers and acquisitions. Our regular participation in client specific teams guarantees that our clients have the legal and scientific support needed for complex intellectual property protection and management matters, and commercial transactions, consisting of outsourcing agreements, the establishment of strategic alliances, and initial public offerings in telecommunications, biotechnology, and other technology sectors.
