

Patent Lawyer Belleville

Patent Lawyer Belleville - Our Intellectual Property lawyers understand that for numerous companies their intellectual property is their most valuable asset. Intellectual property is a key part in attracting and retaining market share. It defines your business in the market place, whether through trademarks that identify your product, patents that exclude competitors, or copyright that prevents illegal copying of your intellectual assets.

We have many years of knowledge within the practical management and effective resolution of intellectual property disputes at all levels of the courts. Our clients come from various trades, from start-ups to global corporations.

Our company believes that the primary factor should be the client's goals and what is sensible from a business point of view. Not each and every infringement of intellectual property rights necessarily warrants a court action. Intellectual property litigation is costly because of the complexity of thorough analysis of rights and utilizing suitable experts. Where infringement disputes are simple and straight-forward, disputes often can be resolved through negotiated agreements with built in deterrence terms. In conditions where court action is considered necessary, we utilize strategies which are compatible with a business-oriented method.

Our company and its lawyers are extremely skilled and experienced at acting for our clients in claims of intellectual property infringement. Our renowned litigators have the skill to communicate to the courts the technical matters involved, whether you need defending against allegations of intellectual property infringement, or you are an owner of intellectual property pursuing infringers. We offer legal representation and advice in disputes connected to patents, trademarks, copyright, domain names, industrial design, trade secrets, interlocutory injunctions ("emergency" relief from infringement awaiting trial) and Anton Pillar Orders (seizure orders and civil search).
